El corcho natural se obtiene de la corteza regenerativa del alcornoque. Con gran esmero y empleando toda nuestra experiencia, fabricamos con dicho corcho suelos que no sólo seducen por su apariencia, sino que también ofrecen un confort perceptible con cualidades como su propiedad «agradable a los pies» y una elasticidad cuidadosa con las articulaciones, que los convierte en la elección ideal para el hogar. Gracias a sus superficies especialmente resistentes, nuestros suelos de corcho son también ideales para áreas comerciales con uso moderado.

El linóleo es un producto natural como el corcho. Se compone de aceite de linaza – que se extrae de las semillas del lino – resinas naturales, roca calcárea molida y madera en polvo. Partiendo de estas materias primas se crean, mediante nuestro proceso de producción, suelos de linóleo llenos de color y de gran calidad. Gracias a su especial resistencia son ideales para áreas domésticas de uso elevado o áreas comerciales de uso normal.
